- (B) Interested individuals may send their bio-data in the prescribed proforma available on the NDMA website along with copies of certificates establishing their educational qualification, experience to **Shri Abhishek Sharma, SRO (Mitigation), National Disaster Management Authority, NDMA Bhawan, A-I, Safdarjung Enclave, New Delhi-I10029, Phone No. 011-26701814, Email. sro-mitigation@ndma.gov.in** within 20 days from the date of publication of advertisement in the employment news.

**( Abhishek Biswas )**  
**Under Secretary (Admn)**

## TERMS OF REFERENCE OF GIS- Database Administrator

Sl No.	Category / Qualification / Experience	Remarks
1	<b>Category Required</b>	<b>GIS- Database Administrator</b>
	<b>Minimum Qualification</b>	<ul style="list-style-type: none"> <li>• Bachelor's degree (B.Tech/BE)in CS/ECE/ Civil/IT, or MCA or MSc in CS / IT</li> </ul>
2	<b>Experience</b>	<p><b>Required: -</b></p> <ul style="list-style-type: none"> <li>• Must have 2years of experience</li> <li>• Building and managing large database applications withMySQL/PostgreSQL</li> <li>• Experienced in SQL query design, execution and optimization</li> <li>• Prior experience in handling geospatial database</li> </ul> <p><b>Preferred:</b></p> <ul style="list-style-type: none"> <li>• Working Knowledge with Geo-Databases PostgreSQL/SQL/Oracle)</li> <li>• Working experience stored procedures, triggers, views, indexes and query troubleshooting/optimization and ability to handle large size databases</li> <li>• Familiarity with programming languages API</li> </ul>
3.	<b>Precise statement of Objectives</b>	<ul style="list-style-type: none"> <li>• Should be fully conversant with the various technologies involved for preparation of geospatial databases</li> <li>• Defining users and enabling data distribution to the right user, in appropriate format and in a timely manner</li> <li>• Designing and implementing databases in accordance to end user's information needs and views i.e., Stakeholders</li> <li>• Should have knowledge about the techniques for geospatial web development based on Java-script and Python.</li> <li>• Should have knowledge on data storage, data retrieval and data processing forcreation of value-added information decisions would be desirable.</li> </ul>

<p><b>4.</b></p>	<p><b>Outline of the tasks to be carried out</b></p>	<ul style="list-style-type: none"> <li>• Install, monitor and troubleshoot database packages in production, development and test environment;</li> <li>• Review currently available datasets at the NDMA, identify the gaps in data and advise on the additional data requirements</li> <li>• Design the structure and format for each item/theme to be included in the database</li> <li>• Identify quality parameters, categorize quality and specify the scope and limitation of data</li> <li>• Examine the current database structure and in line with that develop the assessment tracking module using the same platform</li> <li>• Based on quality definition, identify the methods to be used to assess/test data quality. The methods shall include statistical methods and shall make use of the results of quality definition</li> <li>• All data for building the database shall undergo a validation procedure according to the developed procedures for quality assurance.</li> <li>• Design and develop a meta data scheme based on state of the art conventions and standards.</li> <li>• Develop a data model synthesizing and incorporating data structures and formats and taking linkages with the Geodatabase</li> <li>• Implement the data model and meta data scheme in the DBMS</li> <li>• Test performance of the database queries and implement performance optimization as needed to run large queries.</li> <li>• Implement and enforce security of all databases;</li> <li>• Tune the database regularly for better performance;</li> <li>• Backup, restoration and archiving of databases and database objects;</li> <li>• Designing and implementing training plans on DBMS / RDBMS required for geospatial databases</li> <li>• Provide support to the NDMA-GIS team in uploading all assessment reports.</li> </ul>
<p><b>5.</b></p>	<p><b>Deliverables or Final Output</b></p>	<ul style="list-style-type: none"> <li>• Collection, standardization and storage of data</li> <li>• Minimise database downtime and manage parameters to provide fast query responses</li> <li>• Provide proactive and reactive data management support and training to Stakeholders</li> </ul>

		<ul style="list-style-type: none"> <li>• Perform tests and evaluations regularly to ensure data security, privacy and integrity</li> <li>• Monitor database performance, implement changes and apply new patches and versions when required</li> <li>• Implementation of effective database tools for decision making processes based on available datasets on NDMA-GIS data portal</li> <li>• Guidance to the states on developing geospatial database for DRR</li> <li>• An inventory report of all reviewed data including data resolution, extent and source of data pointing out data requirements needed for Disaster Risk management.</li> </ul>
6.	<b>Schedule for completion of Tasks</b>	<ul style="list-style-type: none"> <li>• Initially the position will be for a period of One years with a possibility of extension based on satisfactory performances.</li> <li>• NDMA can remove the incumbent at any time by giving one month's notice or the incumbent can also resign from the assignment by giving one month's notice to the Employer.</li> </ul>
7.	<b>Remuneration:</b>	<ul style="list-style-type: none"> <li>• The maximum amount of monthly consolidated fee shall be as under:- <ul style="list-style-type: none"> <li>▪ 40,000/- pm Consolidated</li> </ul> </li> </ul>
8.	<b>Maximum Age Limit</b>	<ul style="list-style-type: none"> <li>• 40 years</li> </ul>
